The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/593,895	Applicant(s) WILLE, HEIN	
	Examiner THOMAS A. BEACH	Art Unit 3671	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: on lines 12 & 13, there are an extraneous “) “ that should be removed. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 8 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Poldervaart et al 7,119,460. Poldervaart shows a hydrocarbon exploration system, having a first vessel (110) having a turret around which the vessel can weathervane, the turret being moored (132) to the sea bed, and a second vessel (112) connected with at least one riser (134) to a subsea well, the first vessel being connected to the second vessel via a fluid transfer duct (136) comprising a first end section attached to the turret of the first vessel, a substantially horizontal mid section, and a second end section attached at

Art Unit: 3671

or near the second vessel (fig 2-3), having the second vessel (112) has no large hydrocarbon storage facilities and a hull weight of between 2,000 and 15,000 ton and comprises an upper structure and a submerged base to which second vessel the riser is connected, the base being attached to the sea bed via taut tendons (132A), the weight exerted by the fluid transfer duct (136) on the second vessel (112) being below 1,000 ton, a power generator being situated on the first vessel (110), power being transferred from the power generator (114/116) via an electrical swivel on the first vessel, to a power supply cable, the power supply cable (120) extending along the fluid transfer duct from the first vessel (110) to the second vessel (112), and being supported at least partly by the fluid transfer duct.

Allowable Subject Matter

4. Claims 2-7 and 10-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
